The Arc of Becoming: Medical and Pedagogical Support in the First Phase of Life

August 6 –10, 2025
Threefold Community
Spring Valley, New York

How are we welcoming the children?
Do we have a clear picture of who is
coming? How do the pedagogical and
medical realms support them
spiritually? How do we accompany the
children on their journey into this
earthly world?

“Courage for the Future” by Jennifer Bunday

It is our life’s work to welcome the children coming with open hearts and a clear vision of their unique needs and identities. By fostering a supportive environment, we ensure that every child feels seen and valued when they arrive. The Pedagogical and Medical sections will collaborate to explore how we accompany these young souls on their journey into this earthly world. How do we offer guidance, love, and understanding, creating a foundation of trust and care that supports their entire being?

Join members of the Medical and Pedagogical Sections to explore these questions:

How do we ensure the children feel welcome?

How does what we are doing need to change?
